

Hold On to Your Cash:

Managerial Speech Uncertainty and Financing Conservatism

Sina Soleimanipour*

April 16, 2026

Abstract

Abstract placeholder. A two-paragraph abstract following finance/econ convention will be drafted last (T47) once §I introduction is finalized. Target: 150–200 words. Key claims: (i) managerial Q&A speech uncertainty (UncAnsMgr) predicts within-firm cash accumulation (HC) and leverage reduction (HL) at the firm-quarter horizon, concentrated among credit-constrained firms (HFC); (ii) the effect operates through a precautionary financing channel (Opler et al. 1999; Bates et al. 2009) and is consistent with the financial conservatism cluster documented by Minton and Wruck (2001); (iii) exploratory tests on capital expenditure reveal a competition-moderated investment response interpretable through Grenadier's (2002) competitive real options framework.

Keywords: TODO.

JEL classification: TODO.

1 Introduction

Section placeholder. Drafting deferred to T46 (per skeleton convention: introduction written AFTER the body, once core claims are stable).

2 Conceptual Framework and Empirical Strategy

Section placeholder. Drafting in T44.

3 Main Empirical Analyses

Section placeholder. Drafting in T42.

4 Additional Analyses

Section placeholder. Drafting in T43.

5 Discussion and Conclusion

Section placeholder. Drafting in T45.
